The official minutes are given as short summaries. The information given as bullet points are meant for the NNR2022 Committee only and will not be included in the official minutes.

1. Discuss chapters to be announced for public consultation

All nutrient and food group chapters in NNR2022 will be announced for public consultation for four weeks through the project's official webpage. The first chapter is already announced, and the process will continue throughout the spring, summer, and fall. The NNR2022 Committee will continuously throughout the spring discuss chapters that may be ready to be announced for public consultation. The NNR2022 Committee will make sure to announce the public consultations through several channels in order to inform all relevant stakeholders, scientists and interested parties.

2. Discuss referee comments on chapter drafts

The NNR2022 Committee has developed an extensive procedure for handling the chapters in NNR2022. Chapters are now continuously peer-reviewed and will be adjusted by the chapter authors according to the referee comments, and comments from the NNR2022 Committee, before they will be announced for public hearing through the official NNR2022 webpage. The NNR2022 Committee discussed referee comments for the following chapter: "sodium as salt". The chapter will be returned to the authors with both referee comments and comments from the NNR2022 Committee.
