1. Discuss chapters to be announced for public hearing

All nutrient and food group chapters in NNR2022 will be announced for public hearing for four weeks through the project's official webpage. The first chapters will be announced within the next months and the process will continue throughout the spring, summer, and fall. The NNR2022 Committee discussed the first chapters that may be ready to be announced for public hearing.

2. Discuss referee comments on chapter drafts

The NNR2022 Committee has developed an extensive procedure for handling the chapters in NNR2022. Several chapters have now been peer-reviewed and will be adjusted by the chapter authors according to the referee comments, and comments from the NNR2022 Committee, before they will be announced for public hearing through the official NNR2022 webpage. The NNR2022 Committee discussed referee comments for the following chapters: "vitamin A", "thiamine", "potassium", "fruits, vegetables and berries" and "iodine". The chapters will be returned to the authors with both referee comments and comments from the NNR2022 Committee.
