### **1. Use of NNR**

The manuscript on "Use of NNR" are moving forward and the NNR2022 Committee have discussed and adjusted drafts on all meetings the last months. Submission of the manuscript to Food & Nutrition Research is postponed until the fall.

### **2. Refer from meeting with EFSA**

The NNR2022 project is contacted by EFSA with an inquiry for collaboration in relation to a mandate from the European Commission to update the Tolerable Upper Intake Levels (ULs) for selected vitamins and minerals via Art 36 Grant. The NNR2022 Committee discussed how a collaboration could be organized and if it could be possible for the NNR2022 project to collaborate with EFSA on this mandate. Conclusions are not made at this timepoint.

### **3. Discuss "Methodology for setting DRVs" paper**

The manuscript on "Methodology for setting DRVs" are moving forward and the NNR2022 Committee are still discussing and adjusting drafts. Submission of the manuscript to Food & Nutrition Research is postponed until the fall.

### **4. Comments on PI/ECOTSS from SR Centre**

The NNR2022 Committee prioritized the last five topics (formulated as PI/ECOTSS) for systematic reviews earlier in May. The PI/ECOTSS have now been considered by the NNR2022 SR Centre. The NNR2022 Committee will adjust and limit the scope of the research questions before the SR Centre can develop the protocols. This process will continue in dialog with the NNR SR Centre until consensus is reached. The topics will be announced when consensus for the final formulations are made and all protocols will be published in PROSPERO.

### **5. Plan for a physical meeting at The Norwegian Directorate of Health 2021**

The NNR2022 Committee plan for a physical two-days meeting in Oslo late fall 2021.

### **6. National dialog in connection to meetings UN Food System Summit**

In preparation for the UN Food System Summit that will be held in New York in September 2021, the Nordic countries are organizing several dialog meetings. The results and messages of these dialogues will be channelled into the Summit process and will contribute to the global deliberations. The NNR2022 project is invited to give input to these dialogues, and the NNR2022 Committee discussed and prepared inputs for these meetings.

**7. Discuss procedure for the chapters in NNR2022**

The first nutrient and food group chapters will be ready for referees during the summer. The NNR2022 Committee discussed the procedure finalizing the chapters (i.e. peer review period, open hearing and final editing by the NNR2022 Committee).
