***The official minutes are given as short summaries. The information given as bullet points are meant for the NNR2022 Committee only and will not be included in the official minutes.***

### **1. Discuss chapters to be announced for public hearing**

Postponed to next meeting due to illness in the NNR2022 Committee.

### **2. Discuss referee comments on chapter drafts**

The NNR2022 Committee has developed an extensive procedure for handling the chapters in NNR2022. Chapters are now continuously peer-reviewed and will be adjusted by the chapter authors according to the referee comments, and comments from the NNR2022 Committee, before they will be announced for public hearing through the official NNR2022 webpage. The NNR2022 Committee discussed referee comments for the following chapters: "meal patterns" and "eggs". The chapters will be returned to the authors with both referee comments and comments from the NNR2022 Committee.

### **3. Systematic Review on "dietary fibre intake in children"**

Dietary fibre intake in children is a prioritized topic for *de novo* SR in the NNR2022 project. The argument for this prioritization was the concern of high fibre intake in small children due to increased adherence to plant-based diets. The systematic literature search has revealed few articles and the NNR2022 Committee discussed how to proceed with the SR. In conclusion, it was decided to proceed with the SR as planned as it is important to show that there are data gaps for future research.
