1. Discuss chapters to be announced for public hearing

All nutrient and food group chapters in NNR2022 will be announced for public hearing for four weeks through the project's official webpage. The first chapters will be announced within the next months and the process will continue throughout the spring, summer, and fall. The NNR2022 Committee will continuously throughout the spring discuss chapters that may be ready to be announced for public hearing. The NNR2022 Committee will make sure to announce the public hearings through several channels in order to inform all relevant stakeholders, scientists and interested parties.

2. Discuss referee comments on chapter drafts

The NNR2022 Committee has developed an extensive procedure for handling the chapters in NNR2022. Chapters are now continuously peer-reviewed and will be adjusted by the chapter authors according to the referee comments, and comments from the NNR2022 Committee, before they will be announced for public hearing through the official NNR2022 webpage. The NNR2022 Committee discussed referee comments for the following chapters: "folate" and "calcium". The chapters will be returned to the authors with both referee comments and comments from the NNR2022 Committee.

3. Disclaimer added to chapters during hearing

All chapters announced for public hearing will include a disclaimer that includes information about authors and referees, and how different aspects of sustainability, obesity and physical activity will be integrated at a later timepoint. In addition, it will be clearly stated that the final DRVs and FBDGs will be announced for public hearing at a later timepoint.

4. Method section in chapters

The NNR2022 Committee discussed how the method section in the nutrient and food group chapters should be standardized and how it should be stated that the chapters are updated and extended from the 5th edition of NNR (NNR2012).
