- Erik Arnesen, The Norwegian Directorate of Health, Oslo, Norway
1. Discuss referee comments to chapters

The NNR2022 Committee has developed an extensive procedure for handling the chapters in NNR2022. The main tasks during this fall will be to handle chapters according to the procedure and the main activities in Committee meetings. Chapters are now continuously peer-reviewed and will be adjusted by the chapter authors according to the referee comments, and comments from the NNR2022 Committee, before they will be announced for public hearing through the official NNR2022 webpage.

The NNR2022 Committee discussed referee comments for the chapter on "Magnesium" and "Energy". In addition, the Committee had a short follow-up discussion on the two chapters on potatoes and fruit juice. The chapters will be returned to the authors with both referee comments and comments from the NNR2022 Committee before they will be considered again for public consultation.

2. Discuss chapters ready for public consultation

All nutrient and food group chapters in NNR2022 will be announced for public consultation for eight weeks through the project's official webpage. The consultation period will be extended further during public holidays. The first chapters are already announced, and the process will continue throughout the fall. The NNR2022 Committee will continuously throughout the fall discuss chapters that may be ready to be announced for public consultation. The NNR2022 Committee will make sure to announce the public consultations through several channels in order to inform all relevant stakeholders, scientists and interested parties.

The following chapters were discussed and will be announced for public consultation shortly: "Alcohol", "Dietary patterns" and "Fat and fatty acids".
