1. Discuss setting of DRVs and one-pager for nutrients (vitamin K, calcium, folate, potassium, iodine, riboflavin, choline, pantothenic acid)

Please refer to meeting minutes from 02.11.22 and 15-16.11.22 for information regarding the process for setting dietary reference values (DRVs) for nutrients and one-pager (item 2).

Based on the template for a one-pager that was developed based on discussions at the previous meeting, a one-pager was presented for the following nutrients: vitamin K, calcium, potassium, riboflavin, and pantothenic acid. The setting of the dietary reference values will be discussed again at later meetings.

Due to unforeseen events, the one-pager for folate, iodine and choline will be discussed at the next Committee meeting.

2. Discuss referee comments to chapters

As described in previous meeting minutes (02.11.22 item 1), the NNR Committee has developed an extensive procedure for handling the chapters in NNR2022.

The NNR2022 Committee discussed referee comments for the chapter on "Beverages". The comments from the referees and the Committee will be returned to the authors.

3. Discuss chapters that are ready for public consultation

Please refer to meeting minutes from 19.10.22 for information regarding the process for chapters ready for public consultation (item 2).

The following chapters were discussed and will be announced for public consultation shortly: "Carbohydrates", "Potatoes", "Fruit Juice" and "Vitamin D".

4. Discuss launching event in June 2023

The NNR Committee are planning to publish the final NNR report in June 2023. The Nordic Council of Ministers will arrange the launch during the minister meeting in Reykjavik. The NNR Committee discussed the format of the launching event. The format of the launch is still not decided. The program will be announced as soon as it is finalized in collaboration with the Nordic Council of Ministers.

5. Finalization of background paper 1 on sustainability and discuss public comments and comments from the reference group

The public consultation period for the first background paper on environmental sustainability is finalized. The authors of the paper are in the process of handling all public comments. All comments are scrutinized, and the manuscript will be adjusted according to scientific valid comments.

The second background paper on environmental sustainability was announced for public consultation on November 14 and will be available until January 16, 2023.
