- Ellen Trolle, Technical University Denmark, Kgs. Lyngby, Denmark
-
1. **Discuss setting of DRVs and one-pager for nutrients**

Please refer to meeting minutes from 02.11.22 and 15-16.11.22 for information regarding the process for setting dietary reference values (DRVs) for nutrients and one-pager (item 2).

Based on the template for a one-pager that was developed based on discussions at the previous meeting, a one-pager was supposed to be presented for the following nutrients: folate, potassium, iodine, and choline. The setting of the dietary reference values will be discussed again at later meetings.

Due to illness in the Committee, this item was postponed to the next meeting.

2. **Discuss referee comments to chapters**

As described in previous meeting minutes (02.11.22 item 1), the NNR Committee has developed an extensive procedure for handling the chapters in NNR2022.

The NNR2022 Committee discussed referee comments for the chapter on "Molybdenum" and "Manganese". The comments from the referees and the Committee will be returned to the authors.

3. **Discuss chapters that are ready for public consultation**

Please refer to meeting minutes from 19.10.22 for information regarding the process for chapters ready for public consultation (item 2).

The following chapters were discussed and will be announced for public consultation shortly: "Magnesium", "Energy", "Vitamin C", "Sodium as salt", "Fluoride" and "Chromium".

4. **Time schedule and process for handling chapters**

The project secretary gave a status for all nutrient and food group chapters. More than half of the nutrient and food group chapters has been announced for public consultation. The remaining
chapters will be announced for public consultation during the next weeks and the first weeks of January.

For some chapters, the public consultation will take place in parallel with the peer-review process. The NNR Committee will have weekly meetings from the first week in January. The main task during the winter and spring will be to work on the "one-pagers" that will be included in the summary report and set the final recommendations for nutrients and food groups.
