1. Launch of the final NNR report

The Nordic Council of Ministers secretariate and the project leader informed about the latest plans for the final launch of the NNR report in Reykjavik June 20th. The launch will be arranged in connection to the annual ministers meeting on June 21st. The final program and invitation is not confirmed at this timepoint, but will be announced by the Nordic Council of Ministers shortly.

2. Presentation of the first draft of the summary report

The project leader presented the outline and first draft of parts of the summary report. The summary report will be the main publication in the NNR project and will include the NNR Committee’s conclusion for all nutrients (dietary reference values) and food groups (science advice for food based dietary guidelines), based on both health outcomes and environmental sustainability. The summary report will also include a summary of all background papers (disease burden, physical activity, food and nutrient intake, body weight and background papers on sustainability).
Nutrient and food group background papers will not be included in the summary report, however they will be part of the main NNR report that will be available as an online publication at Norden.org.
