- Helle Margrete Meltzer, Norwegian Institute of Public Health, Oslo, Norway
- Ursula Schwab, University of Eastern Finland, Kuopio, Finland

1. Discuss background chapter on physical activity

The NNR2022 Committee continued the discussion on the first draft of the background paper "Physical activity". Information in this chapter will be integrated in food and nutrient chapters, were relevant.

2. Discuss paper "Use of NNR"

As described in previous meeting minutes, the NNR2022 Committee are developing a background paper that describes methodology and uses of dietary reference values (DRVs). This paper will be submitted for publication in Food & Nutrition Research. The uses described in the previous edition of NNR (NNR2012) are used as a starting point in addition to recent reports from food and health authorities and international food and health organisations. The paper describes practical guidance on how the NNR DRVs can be correctly used in various conditions and situations.

The paper will go through one final round of adjustments before it is submitted for publication.
