Sustainability and diet

• More than climate
  – Environment, biodiversity, carbon sequestration…

• More than environment
  – Economic and social aspects
Sustainability and diet

• Production systems and sites
  – How do we use the land?
  – Grazing
  – Human food vs animal feed and biofuels
  – Crop rotation
  – Fertilizers

• Planetary boundaries
Sustainability and diet

- LCA- Life Cycle Analysis
In conclusion

• Production
  – How and where?

• Planetary boundaries

• LCA
Thank you for your attention
