- Lāsma Piķele, The Ministry of Health of the Republic of Latvia, Riga, Latvia
- Haidi Kanamäe, National Institute for Health Development, Tallinn, Estonia
This was the last ordinary committee meeting before the launching in Reykjavik on 20th of June.

1. **Completion of the report**

The final proofs will be sent to the NCM publication office today. If we should detect any mistakes later, they can be corrected online. Including the appendices, the report will be about 370 A4 pages. Some important changes to the report since the previous meeting were presented by Rune and discussed.

2. **Changes of DRVs since NNR2012**

Several nutrients have new, and in many cases increased, recommendations (either RI or AI) since the previous NNR2012. The basis for the new DRVs are clearly presented in the report. The main reason for changes is recalculations based on new evidence. Some specific changes will be presented in the webinar in Reykjavik.

3. **Webinar and launch in Reykjavik**

Rune informed about the agenda for the launching event.

Below are some general points from our discussion:

- Rune will give a keynote lecture (about 10 minutes) which must be on a very basic level as the audience and target group is politicians.
- There will be an international panel debate discussing what the world can learn from NNR, and how the Nordic authorities should implement it.
- Rune showed his plan for the presentation where he will summarize the key messages about healthy and environmental diets.
- The committee members that will present during the webinar will meet Thursday and Friday to discuss.

4. **Miscellaneous**

Some other editorial changes to the report were discussed.
