

Søk etter studier om effekter av og erfaringer med bruk av prevensjon

Kvantitativ problemstilling: Hva er effekten av at fertile kvinner i LAR anbefales langtidsvirkende reversibel prevensjon ved oppstart i LAR sammenliknet med effekten av ikke å anbefale langtidsvirkende reversibel prevensjon?

Kvalitativ problemstilling: Hvilke erfaringer finnes med å gi eller motta informasjon om langtidsvirkende reversibel prevensjon til fertile kvinner i LAR?

Flytdiagram. Oversøkt over utvelgelsesprosessen for studier av prevensjon

Det ble gjort et samlet litteratursøk i databasene Medline, Embase, PsycINFO, Cinahl, Web of Science, Cochrane, Epistemonikos og Sociological Abstracts etter oversikter og primærstudier av både effekt og erfaringer med hensyn til bruk av prevensjon blant kvinner i LAR (se søkestrategi nedenfor). Søket identifiserte 175 mulig relevante studier, og 167 av disse ble ekskludert etter gjennomgang av tittel og abstrakt. Ytterligere seks studier ble ekskludert etter lesing av fulltekst. To studier, en kvantitativ og en kvalitativ, ble inkludert.
